Date approved:	26 July 2021

IntegrateX is bot engine for hoteling industry, it gets data from integrated PMS systems & GuestX system based on page or form scan. For more details, see BDU SOW V1.5.pdf

Pre-Requisites

GuestX Backend	PHP 7.4, Laravel Framework
IntegrateX	Windows 10+, Mac 10.14.+
Browser	Chrome 91.0.4472.164

Release Contents

IntegrateX	IntegrateX.msi
IntegrateX API	PHP {REST} API
CMS Database	Migration Scripts

Deployment Steps

1- Backup

- GuestX Database
- GuestX PHP Deployment Release

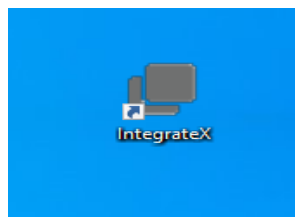

2- Installation

- GuestX PHP Deployment, xcopy of PHP code.
- Update .inv file from root directory, add/ update entry of
"BDU_API_URL=http://bduapi.btserver.com"
- Run "IntegrateX.msi" installer or download from live guestX application.

Change "app.config" file, it's located in IntegrateX installation folder. Add/ update API URI., as shown below

```
<?xml version="1.0" encoding="utf-8" ?>
<configuration>
  <appSettings>
    <add key="apiUrl" value="http://bduapi.btserver.com/" />
    <!--<add key="securityToken" value="758rX+7S0phKZ7zJaAuI4uQ"/>-->
  </appSettings>
</configuration>
```

3- Test Installation

- Double click on shortcut IntegrateX.
- Open login form.

- Enter User Name "reroet1@gmail.com".
- Password "xxx".
- Click on "Login" button.
- Login Successful.

Roll Back Steps

- Restore GuestX Database backup.
- Overwrite GuestX PHP backup
- Uninstall IntegrateX from control panel "Client Machines".
